

Concept Note

Tolerance means the capacity for or the practice of recognizing and respecting the beliefs or practices of others.. Social differentiation if not managed in a positive and tolerant way may lead to situations of conflict. Tolerance is the only way to establish peace in society. Adhering to the way of tolerance enables creation of an environment conducive to national integration in which everyone accepts, recognizes and contribute with constructive ideas, actions for the welfare of society. However 'flawed' a virtue it may be, tolerance may be the only thing that stands between peaceful coexistence and violent inter-group conflict. This makes tolerance a topic of great scientific as well as practical importance. India is a multi-cultural society and tolerance is an integral part of India's tradition. India has a long history of the culture of tolerance. India is a multi-religious society and all major religions live in India in harmony. One can say that India has proved to be a peaceful haven for different religions and cultures. By way of organizing this seminar, it is expected that it would surely bring all academicians, students, researchers at one platform for discussion and discourse that shall bring about awareness among people and society on issues of tolerance, pluralism, secularism and its relevance in the social and democratic process leading to National integration.
